

Silky Saws

< HAYATE

Heavy duty extension pole saw available in four (4) lengths.

- High tech curved blades with a custom designed sheath.
- Lightweight aluminum pole with comfort grip and cushion tip which helps reduce pole damage.
- Able to purchase an optional sickle blade.

The blade is made of a special alloy steel, harder than conventional blades.

▲ GOMTARO

A beautifully balanced MIRAI-ME sheath saw. An extensive range of sizes to provide for all pruning requirements: 180mm with 7.5 teeth/30mm; 210mm, 240mm, 270mm and 300mm with 8 teeth/30mm. Mono-construction with a moulded rubber hand-grip, the GOMTARO is ideal for all pruning tasks, with Gomtaro fine teeth especially suitable for small branches.

▲ ZUBAT

A heavy duty professional curved saw with blade length 330mm, 7.5 teeth/30mm, suitable for cutting large branches. mono-construction with a moulded rubber handle. Specially designed sheath for the curved blade with a detachable belt holder.

< HAYAUCHI

A true professional heavy-duty extension pole saw, available in three sizes: with 1-extension reaching 3.7m fully extended including blade length; 2-extensions reaching 4.9m and 3-extensions reaching 6.3m. The HAYAUCHI is a 4-RETSUME saw with 6.5 teeth/30mm and blade cutting length 390mm. The upper sickle is used to cut vines; the lower sickle to undercut bark allowing a clean cut without damaging the tree.

The aluminium alloy extension pole is race-track shaped, giving precise control to the direction of the saw blade (especially important for high cutting) and also giving strength and rigidity to the pole, reducing bending to the minimum.

> POCKETBOY

A little giant, the POCKETBOY has grown from Silky's GOMBOY family. Super lightweight and durable with a strikingly compact design and marvelous cutting capacity. Both 130mm and 170mm versions of the POCKETBOY accept fine and large tooth blades.

▲ MASARU

A powerful heavy-duty 4-RETSUME saw with 5.5-7 teeth/30mm and available in two blade lengths 330mm and 360mm. Well balanced and fast cutting, the MASARU is suitable for heavier tasks or cutting large branches. Mono-construction gives strength and flexibility to the full length of the saw.

< BIGBOY

A hand-saw with a uniquely shaped curved blade for cutting branches. The curved shape of the 360mm blade with 6.5 teeth/30mm, enables you to cut high up branches smoothly. The blade is taper ground to reduce resistance giving smoother, easier, faster cutting performance.
