

# Bandit 20XP-HD Whole Tree Chipper

The ultimate Bandit in productivity, the Model 20XPHD is the first of our Whole Tree range. It has been purposely designed to be fed with a range of heavy duty loaders, including excavators. The open top infeed hopper allows easier feeding with damaging the machine or the loader.

Officially rated as 20" capacity, this exceptionally hungry chipper actually features a large 26.5" by 24.5" throat opening, fed by a whopping 27" diameter, chain driven top feed roller. Bandit's slide box feed system coupled with the live conveyor feed makes light work of pulling in and crushing the most stubborn forked limbs and dense hardwood.

The 20XPHD is powered by the Cummins, 365HP diesel, six-cylinder engine and comes standard with radio remote control, forestry style discharge and hydraulic jackstand & rear stabilizers.

Built stronger than its hand fed counterparts, the Bandit 20XPHD is the obvious choice for frequent large tree removals and land clearing contractors.
